

Installing Wireless Printing on Macintosh Laptops

- 1) Install all updates for your machine.
- 2) Click the **Printing & Copying** link on the Services tab of www.library.musc.edu.
- 3) This will take you to a Box folder that has the drivers for our printers.
- 4) Open the Macintosh folder.
- 5) Download the driver/s for the printer/s you wish to install.
- 6) Once the download is finished, double click the driver to start the install process.
- 7) You may get a button marked **Add Printer**, you can click this or click the apple on the menu bar.
- 8) Choose **System Preferences**.
- 9) Click the **Printers & Scanners** icon.
- 10) Click the + sign below the existing printers.
- 11) Click **Add Printer or Scanner**.
- 12) Choose **IP**.
- 13) The address is **goprint-sw.library.musc.edu**
- 14) The protocol is **Line Printer Daemon – LPD**.
- 15) Queue:

Printer Name	Model	Queue
4th floor Color	HP LaserJet M551	4flcolor
4th floor B&W A	HP LaserJet M602	4flbwa
4th floor B&W B	HP LaserJet M602	4flbwb
3rd floor Color	HP LaserJet M551	3flcolor
3rd floor B&W	HP LaserJet M602	3flbw
2nd floor Color	HP LaserJet M551	2flcolor
2nd floor B&W A	HP LaserJet M602	2flbwa
2nd floor B&W B	HP LaserJet M602	2flbwb
- 16) You may use the Queue for the **Name** or use something more descriptive.
- 17) For **Use**, choose **Select Printer Software**.
- 18) Type in the printer model number, either m551 or m602.
- 19) Click on the model and then **OK**.
- 20) The printer will be set up and a list of available options will appear. Make sure the box for **Duplex Unit** is checked. Click **OK**.
- 21) You are ready to print.
- 22) When you print something, your computer name will appear on the GoPrint station.
